

## PERSONAL NOTES

Arrivals and Departures of Residents and Visitors

### IN THE SOCIAL WORLD

The Column Everybody Reads—Chat About Your Friends and Neighbors—Here and There.

Elwood Williams, of Rainsburg, was a Bedford visitor on Monday.

Today, Armistice Day, having been declared a National and state holiday, the banks will all be closed.

William J. Turner, of New Buena Vista, was transacting business in Bedford on Monday.

Mrs. Harry Chamberlain, of Pittsburgh, is visiting at the home of Mrs. Emma Souser, of West Pitt street.

J. L. Berkheimer, of Pavia, transacted business in Bedford on Wednesday.

Mr. and Mrs. Emory Howsare of Haneyville, were transacting business in Bedford yesterday.

Come out to see the football game this afternoon at Northside Park between the Bedford Independents and the Altoona Independents.

Mr. and Mrs. J. P. Andrews, of Everett, visited their daughter, Mrs. Victor Barkman, on Saturday night and Sunday.

Messrs. Joseph McGuinn and Charles Schry of Johnstown, visited recently at the home of Mr. and Mrs. Peter Will.

Miss Grace Heming has accepted a position in Stark's confectionery. She took up her duties Monday morning.

Mrs. Charles Horton and son, of Huntingdon, are guests at the home of the former's mother, Mrs. M. P. Heckerman.

Rodney Goughnour and Earl Kauffman, of Johnstown, were visitors at the home of E. W. S. Rock heirs at New Paris recently.

Messrs. Elmer and Forrest Reighard, Robert Amos, Thomas Stiffler, and George Sill motored to Washington, D. C., yesterday to attend the Armistice Day celebration today.

The ladies of St. James' Lutheran church in Pleasant Valley will hold a chicken and waffle supper at the home of George Fetter on Tuesday, November 15th from 4 to 10 p. m.

Mr. and Mrs. John F. Leonard returned on Wednesday from Hyndman where they attended the funeral of the latter's sister, Mrs. William Chelner.

The ladies of St. Thomas Catholic church will hold a chicken and waffle supper in the basement of the church from 5 to 8 o'clock on the evening of November 18th.

The Ladies Aid of Bald Hill church will hold a miscellaneous sale of pumpkin pie, sandwiches, cake, ice cream, etc., at Mrs. Frank Shearer's from 5 to 10 p. m. on November 19. Everybody welcome.

Your community has a right to your civic loyalty. It supports you and you should support it. A Chamber of Commerce will make your support easy and effective.

Mrs. Victor W. Reed, of Roanoke, Va., who arrived here last week to visit her sisters Mrs. Reed Irvine and Mrs. Lillie Feight, returned to her home on Wednesday and was accompanied by her mother-in-law, Mrs. Ozena Reed.

Mrs. Joseph Hood, of New Florence, arrived in Bedford on Saturday evening and was accompanied home on Tuesday by his wife and little son, Paul, who had been visiting her aunt and sister, Misses Lizzie and Nellie Bain.

Marriage licenses were granted in Cumberland recently to: Emory Claar and Sarah C. Acker, both of Imler; John Cottle and Della May Ritchey, both of Yellow Creek; and Michael E. Imes and Ethel May Adams, both of Flintstone, Md.

Word has reached the Gazette that George M. Bennett, of Artemas, suffered a severe stroke of paralysis Tuesday evening. Election day, about 8 o'clock. His left side is affected. We are informed that Mr. Bennett is conscious and can talk and knows his friends.

Mr. S. U. Troutman, of Route 2, left this week for a trip to Cincinnati, Ohio, Rockford, Ill., St. Louis, Mo., Omaha, Neb., and other points of interest. On his return trip he will stop at Chicago where he will be the guest of his brother, G. J. Troutman. Also at Akron, Ohio and Pittsburgh. He expects to be gone about six weeks.

MARRIAGE LICENSES

Elmer Cooper, of Clearville, and Verna Marie Croyle, of New Enterprise.

Alex Taylor and Minnie Layton, both of Six Mile Run.

John Spearing, Jr., of Riddlesburg and Catherine E. Weimer, of Saxton R. D.

James F. Burkhardt, of Johnstown, and Edna Viola Hinson, of Kelixville.

Randle Theodore Lundry and Vera Baker, both of Canton.

M. E. CHURCH

J. V. Royer, Pastor.

9:45 combined service—Father and Son Day.

2:00 Jr. League

6:30 Epworth League

7:30 Preaching

UNOFFICIAL ELECTION RETURNS

FOR BEDFORD BOROUGH AND BEDFORD TOWNSHIP.

In the election for the Borough held last Tuesday the following results are unofficially announced:

For Justice of the Peace Frank E. Naus and J. Reed Irvine were elected.

For School Director, J. Frank Russell and L. D. Blackwelder.

For Councilmen for a full term, W. A. King, Harold Smith, Joe Allen and Frank Lawrence; and for a two year term, John C. Smith.

For Tax Collector, John Banner was elected over Robert P. Amos.

For Assessor, Oscar R. Diehl was elected over W. S. Lysinger.

For Judge of Election in East Ward, C. W. Stern and West Ward, M. A. Stoner.

## UNOFFICIAL ELECTION RETURNS

FOR BEDFORD BOROUGH AND BEDFORD TOWNSHIP.

In the election for the Borough held last Tuesday the following results are unofficially announced:

For Justice of the Peace Frank E. Naus and J. Reed Irvine were elected.

For School Director, J. Frank Russell and L. D. Blackwelder.

For Councilmen for a full term, W. A. King, Harold Smith, Joe Allen and Frank Lawrence; and for a two year term, John C. Smith.

For Tax Collector, John Banner was elected over Robert P. Amos.

For Assessor, Oscar R. Diehl was elected over W. S. Lysinger.

For Judge of Election in East Ward, C. W. Stern and West Ward, M. A. Stoner.

Inspectors in East Ward are Richard Willoughby and Ross Lysinger; and in West Ward are W. Gephart and William Edwards.

For Burgess S. Russell Longenecker defeated M. W. Corle.

Assistant Assessor in East Ward is Howard Diehl and in West Ward, Harry Cronwell.

Auditor is W. J. Davidson as high man with Arthur Russell and Pearl Shoemaker tie both receiving 382 votes which is unofficial and the official count which starts today, Friday, may be sufficient to determine this election; if not, there will be a vacancy and the court will appoint.

For both Constable and High Constable, Harry Easter was elected.

In Bedford Township the School Directors elected are James A. Heming and Charles Beegle.

Judge, John Pierson.

Inspectors, Elmer Dibert and Clayton Claar.

Supervisor, James A. Points.

Justice of the Peace, John Anderson.

Assessor, W. J. T. Anderson.

Tax Collector, O. R. W. Dively.

Constable, Frank J. Zimmers.

Auditor, George Stickler.

Complete return will be published next week.

## STATE ELECTION RETURNS

The Republicans carried the State with a remarkably reduced majority.

Schaffer has a majority of about 250,000 over Eugene C. Bonniwell for Supreme Court Judge so far a unofficial returns are available.

Schaffer's normal majority should be about 800,000. Outside of the Supreme Court Judge there was no state election.

William A. McGee, of Pittsburgh, was elected Mayor by a plurality of about 50,000. His plurality should have been about 125,000.

In Reading the Republicans captured the City Council by a greatly reduced majority compared to last year's vote. The Democrats carried the county, Berks, by a tremendous majority after losing it to Harding and the other Republican candidates last year. The sweeps carried all the Court House, prison and alms house candidates into office.

While Altoona is clearly and very strongly Republican, William C. Myton, Democrat, and Samuel B. Taylor, Labor, were elected Councilmen by a big majority for the City of Altoona. In the county, Blair, Robert A. Henderson, Democrat was defeated by Thomas J. Baldrige, Republican for Judge by a small plurality, where the Republicans have a majority of at least 6,000 and in this tremendous falling off of Republican votes Joseph C. Cherry, Democrat, defeated his Republican opponent, Grant McClellan, for Sheriff by at least 2,000 majority.

EVERETT BOY HURT

Archie Poor, aged 17, a well known Everett boy, is confined to the Nason hospital, Roaring Spring, suffering from serious gun shot wounds of the right chest and the loss of his left thumb, as a result of one of the season's first hunting accidents in the Everett vicinity.

Poor was out for a days hunting and was hustling through a grove near Everett when he stumbled and accidentally discharged his shot gun, which he carried in his left hand, the shot blowing off his left thumb and tearing a hole in the right chest. The shot did not penetrate the lung, however, and unless unexpected complications arise, the hospital authorities are expecting him to recover. Prior to being taken to the Roaring Springs institution the young man was given first aid treatment by an Everett physician.

HOFFMAN ACQUIRE ADDITIONAL PROPERTY

Hoffman's Incorporated at this place, better known as Hoffman's Hotel and Garage, recently purchased the property owned by A. J. Farrell, fronting sixty feet on the Lincoln Highway and extending north to the Juniata river.

This property immediately adjoins their present hotel site. The old frame house now standing will be offered for sale, as it is the intention to remove it to accommodate extensive improvements to Hoffman's famous hostelry by the opening of the 1922 tourists season.

PATRIOTIC ADDRESS AT THE COURT HOUSE TONIGHT

Professor Lloyd H. Hinkle Will Deliver the Address of the Evening Representatives of Altoona and Cumberland Chambers of Commerce Will Also Make Short Talks

When the pall of war hung over us and our boys were at the battle front, those of us at home were inspired to greater achievement by the ringing words of Professor Hinkle on many occasions, and the people of this community therefore know they will not be disappointed tonight. The meeting will start promptly at eight o'clock. Music will be furnished by the Bedford Band—good, rousing, patriotic music. And following Professor Hinkle's address there will be short talks by Mr. J. Milton Patterson, a leading member of the Cumberland Chamber of Commerce, and Mr. M. P. Neighbor, Manager of the Altoona Chamber. These gentlemen will point out briefly how their respective Chambers have obtained outstanding civic and industrial improvements for their cities, showing what these organizations are doing to make good our obligation to those who made sacrifices in the late war—our obligation to "carry on." The local Chamber of Commerce committee in charge of the program promises a highly interesting, inspiring program—not too long—and it will be a fitting close to Armistice Day for every man and woman who attends. Several cars will make the trip from Altoona and Cumberland, loaded with visitors, and Bedford should turn out en masse for the occasion.

A. E. F. COMING

The Committee has announced that the "A. E. F." is coming, but whether this has any connection with the American Expeditionary Forces or some other feature of the program could not be learned. When asked as to this, members of the committee simply smiled, with an air of mystery that said "Wait and see." The Chamber of Commerce Organization Committee has made such strides in the past few weeks that almost anything seems possible. So, "Come and see."

SPLENDID PROGRESS MADE

The temporary organization reports splendid progress in its plans to establish a Chamber of Commerce here, having received assurances from a great many citizens, in all walks of life, that they are heartily in favor of this movement, and will do their part in the work that yet remains to be done. Plans are maturing very rapidly, and it is now stated that The Bedford Chamber of Commerce will be permanently organized at a public meeting to be held November 28. The committee can use more workers—volunteer workers, who will take off their coats and give their time and thought and energy to this movement for Bedford.

COMMUNITY DINNER NOV. 21

Mr. Casey, who is coming to Bedford to address the big community dinner at the Fort Bedford Inn on November 21, is one of the nation's leading authorities on organized community work, and has spoken before audiences in some of the largest cities in the country, from one end of the United States to the other. He is a very forceful speaker, constantly in demand, and the people of this community who are interested in the future of Bedford should not fail to hear him, as well as Hon. John M. Reynolds and H. C. Heckerman, who will also address this gathering. The committee promises a typical Thanksgiving Dinner.

CIVIC SUNDAY

The Chamber of Commerce has asked pastors to observe Sunday, Nov. 20, as "Civic Sunday", speaking from texts that point out the civic duties and privileges of every good citizen in his own community.

## PATRIOTIC ADDRESS AT THE COURT HOUSE TONIGHT

Professor Lloyd H. Hinkle Will Deliver the Address of the Evening Representatives of Altoona and Cumberland Chambers of Commerce Will Also Make Short Talks

MUSIC PUPILS' RECITAL.

On Thursday evening, November 3, a most interesting music pupils' recital was given at the home of Miss L. D. Shuck, West Pitt street. Over one hundred guests were present including the parents of the students. A social season at the close of the program was much enjoyed by all. Refreshments were served.

Following is the program as rendered:

Duet Bertha Jane Caldwell L. D. Shuck

Musical Clock Mary Ellen Mardorff L. D. Shuck

In Twilight Marguerite Diehl L. D. Shuck

The Return Leo Karns L. D. Shuck

Little Waltz Leroy Cessna L. D. Shuck

Bright Daisies Jean Brice L. D. Shuck

Schubert's Serenade Henry Strook L. D. Shuck

Summer Joy Elaine Clark L. D. Shuck

Con Amore Catherine Earnest L. D. Shuck

Sunset's Golden Glow Katharine Shuck L. D. Shuck

Sister Dear Mary Shuck L. D. Shuck

So Long Ago Paul Elyer L. D. Shuck

Rose Fay Helen Powell L. D. Shuck

Il Trovatore Charles Imler L. D. Shuck

Song of Love Almina Cessna L. D. Shuck

Fur Elsie (Beethoven) Margaret Colwell L. D. Shuck

On the Heath Dale Guyer L. D. Shuck

Polonaise Margaret Smith L. D. Shuck

Duet Mary Russell L. D. Shuck

Brook in the Wood Dorothy Bortz L. D. Shuck

Waltz Movement Philip Royer L. D. Shuck

June Queen Jane Weisel L. D. Shuck

Severe Grief Marguerite Davidson L. D. Shuck

At Evening Clyde Bowser L. D. Shuck

Love and Passion Jeanette Barnett L. D. Shuck

Song of the Brook Marie Earnest L. D. Shuck

Golden Road Mary Sue Biser L. D. Shuck

Floating in Moonlight Elizabeth Davidson L. D. Shuck

Hearts and Flowers Charolette Brightbill L. D. Shuck

With the Guitar Helen Bell L. D. Shuck

National Polish Dance Anna Cessna L. D. Shuck

Simple Confession Helen Heckerman L. D. Shuck

Mountain Stream John Imler L. D. Shuck

Hyattia Josephine Corle L. D. Shuck

Air de Ballet Margaret Hulse L. D. Shuck

Humoresque Hazel Mantler L. D. Shuck

(a) Frances Ruth Steiner L. D. Shuck

(b) Souvenir Ruth Steiner L. D. Shuck

AND NOW FOR A BANNER ROLL CALL.

November 11 to 24.

Every person in Bedford County must be asked to join or renew their membership in the Red Cross between Armistice Day and Thanksgiving.

The Red Cross is spending \$10,000,000 a year to help disabled fighting men.

There are 26,000 of these heroes in the hospitals of this country who are depending on the Red Cross for many services and comforts.

The Red Cross is still serving the able-bodied fighting men in the Army, Navy and Marine Corps.

There are millions of destitute European Children that the Red Cross is clothing.

At a recent meeting of the American Legion in Kansas City a resolution was passed pledging their support to the Red Cross.

You are a member of the Red Cross for one year for the sum of \$1.00 only. WILL YOU BE A MEMBER?

There will be a house to house canvass for Red Cross members in Bedford Borough on Sunday, November 20th. Please join or renew your membership in the Red Cross on that day.

MINISTERIAL ASSOCIATION TO MEET DEC. 5

The Bedford County Ministerial Association met in the Methodist Episcopal Church of Everett last Monday morning. Revs. W. H. B. Carney, H. B. Townsend, J. V. Royer of Bedford, J. J. Weaver, C. H. Retterer of Everett, and I. E. F. Fisher of Clearville were present. Rev. B. V. Ridgely was elected First Vice President of the Association to fill the place made vacant by the removal of the Rev. R. B. Whipple. A program committee consisting of Revs. C. H. Ketterer, J. J. Weaver and J. V. Royer was appointed. Most of the morning was taken up with a discussion of certain moral and spiritual problems with which the ministers of the County have to deal, and appropriate action was taken. The next regular meeting will be held in the Lutheran Church of Bedford on December 5.

SPECIAL PRIZES AT FAIR

The following special prizes were awarded at the Bedford County Fair held in September:

Isaac Stickler, Virginia Fox hounds, \$3.00

William Witmar, Taxidermist's collection \$25.00

Harold Hoover, Boy's and girl's stock judging contest, 1st prize 5.00

George Hull, Stock judging contest 2nd prize 3.00

Lewis Imler, Stock judging contest 3rd prize 2.00

## COUNTY READY FOR RED CROSS DAY

BEDFORD COUNTY READY FOR RED CROSS DAY, TO OPEN FRIDAY MORNING

Bedford County is ready for the annual Red Cross Roll Call which opens on Armistice Day—Friday.

The nation-wide dates—Nov. 11 to 24—will be observed throughout the county excepting in Bedford where an effort will be made to "clean up" the roll call on Sunday, November 20th.

The American Legion has offered to devote their time and energy in helping the great cause, therefore in Bedford it is planned to concentrate the Roll Call one day, Sunday, November 20th at which time the members of the American Legion will visit every home in the Borough enrolling names. It is hoped that the entire town can be covered in one day and that Bedford will step to the forefront as a 100 per cent town, and a 100 per cent one-day answer to the Roll Call. In the country, owing to the fact that the one-day plan cannot be properly carried out, the Roll Call will continue the entire period.

With the end of the war the Red Cross did not cease to function. In fact it broadened its scope, became a more vital element in community life, was brought even closer to home during its war its work was directed solely toward relieving the hardships of the soldier boys. Since then it has taken up the burden of caring for these self-same boys, now home and in need of counsel or assistance. It has taken under its benevolent care the families of those soldiers, wherever such family needs its ministering hands; and has established even more firmly its title to being "The Greatest Mother in the World."

DAIRYMEN ACTIVE IN ORGANIZATION WORK

The Cessna, Charlesville and Osterburg locals of the Phila. Inter-State Milk Producers Association held meetings on Monday night to elect delegates to attend the annual meeting of the Association in Philadelphia December 5th and 6th.

The Everett Local met Thursday evening in Firemen's Hall for the same purpose and had Dr. Caster, Veterinarian for the Supply Wills Jones Company speak on tuberculosis in cattle.

Mr. E. R. Quackenbush, Field Man for the Phila. Inter-State Milk Producers' Association has spent the week in this country assisting the Locals in increasing their membership.

This organization of milk producers has been very active in Bedford County during the past year. Previous to this two Locals were in existence. The organization now boasts of three additional Locals with over 175 members in the county.

MISSING

John W. Egan, farmer, has been missing from his home at Villa Nova, Pa., since Monday afternoon, October 17th.

He left home to go to Quakertown, Pa. to make certain farm purchases and has not been seen since.

Mr. Egan is 40 years of age; married; is five feet ten and a half inches tall; weighs 150 pounds; has dark brown hair; short worn teeth; hazel blue eyes; wore a dark gray suit with service ribbon in coat lapel, and a brown felt hat when last seen.

He is an ex-soldier, having served with the Canadian army during the war and is a Canadian subject.

Will anyone seeing a man

# Naval Errors That Delayed Allied Victory Discussed by Daniels

The chief allied naval error of the war—On both sides of the Atlantic in some things hindsight proved better than foresight—United States should have concentrated on construction of destroyers in 1915—Is criticism of Jellicoe justified?—Outstanding failure of the war was not to have shut the submarines up in their nests earlier.

By Josephus Daniels  
Former Secretary of the Navy—  
1913 to 1921.

After ever ywar one can look back and see that somewhere there was lack of foresight—somewhere there was wanting vision translated into action, somewhere there was a failure to grasp a new and daring plan which might have turned defeat into victory or have hastened the day of peace.

When one reflects upon the zeal, courage and success of the British navy in freeing the seven seas from German traffic, one is filled with admiration for its spirit and achievements. But it made mistakes, as we, and all the other navies, did.

Over on this side of the ocean what was our chief naval error?

It was that we lacked the foresight in 1915-16, largely because we did not have the information which was kept from neutrals, to concentrate upon the building of destroyers to the exclusion of larger ships. To be sure, we were utilizing before the United States entered the war every available facility for the building of destroyers.

## More Destroyers Needed.

The great three-year programme proposed by me in 1915 and voted by Congress in 1916 embraced fifty destroyers to be constructed in three years, along with sixteen capital ships and ten scout cruisers.

Looking back upon that programme, it is clear now, taking advantage of what we learned during the war, that it would have been wiser to have delayed contracting for so many capital ships, and built hundreds of destroyers, the craft most effective against submarines. Our ship construction programme during the war included approximately a thousand vessels. This in addition to the 1,547 ships converted for naval purposes.

There was no delay in pressing work on destroyers. Immediately after congress authorized the three-year programme, contracts were made for the twenty authorized first year as well as twenty-seven submarines, four battle ships, four battle cruisers and other vessels. In March, 1917, before we entered the war, as soon as funds were available, twenty four more were ordered; additional orders were given as rapidly as the contracts could be placed and by the middle of October we were building or had contracted for 270.

## All Records Broken

Millions had to be spent for new facilities to build them—enlargement of old ship yards, building of giant new plants. It was a great job, but we broke all records in rapid construction when we struck our gait. The house naval committee, after thorough investigation, said in its report made March 4, 1918:

"When it came to building additional destroyers, especially those of the large programme, it was found that the ship-building facilities of the country were fully absorbed with the vessels then under construction and it would be necessary to create new facilities. The plans adopted required more than doubling the capacity available last summer for building destroyers, and that capacity was materially greater than before the war. In spite of speed in construction, these vessels are not being slighted in workmanship or appliances.

## Experts Didn't See It

Looking back, I wished every day during the war that when we began the big naval expansion in 1915, we had asked congress for the money to build 300 destroyers at that time. By concentration in 1915-16 we would have had most of them ready in the first months of the war. It is a fact, however, that no naval expert and nobody in congress suggested the big destroyer programme we began in the stress of war.

Across the seas what was the great naval error of our allies?

Some of the ablest writers declare that it was the tactics of Admiral Jellicoe at the battle of Jutland. The admiral has written a most interesting book undertaking to show that his method of fighting the battle was right, when all the conditions are considered. The admiral is a brave and learned officer, and a gentleman of charm and real stuff, but he made the mistake of his life when he wrote his story of the grand fleet.

## "Confession and Avoidance"

I read it on my way to Europe in March 1919, and began it with a feeling that Admiral Jellicoe had been harshly and unjustly treated by the critics. But, when I read the last chapter my feeling was the same as that of a distinguished Britisher whom I met a few weeks later and who said to me:

"For his own reputation Jellicoe ought not to have written that book. At the best it is a plea of confession and avoidance."

The basis for this opinion lies in the fact that the admiral charges his failure to win a decisive victory to the superiority of the Germans in certain material (and to the low visibility that prevailed); whereas the admiralty had told the world that in this very material Great Britain excelled all other nations—Jellicoe had directed its material division.

Commander Bellairs, M. P., may be too severe in his criticism of Admiral Jellicoe, but all who are interested in the naval history of the war should read both Jellicoe and Bellairs—and I hope we will be able to read some day Jellicoe in rejoinder to Bellairs.

## Point to Controversy

The crux of the battle is: Should Jellicoe have turned the whole fleet away at 7:10 because "a flotilla of enemy destroyers supported by a cruiser was observed on a bearing S. 50 degrees W. from Iron Duke?" Bellairs says: "It was to avoid this attack of eleven destroyers that twenty-seven battleships turned away." "It is impossible," Bellairs continued, "to imagine a more definite break from the whole spirit of naval tradition, or from its practice, united to modern inventions, of the golden rule that once an enemy is sighted he must be cut off, closely engaged and annihilated. Our cruisers and destroyers, who could have pressed home their own attacks on the enemy line, were by this time in the van." Finally, after a elaborate discussion, Bellairs says: "It suffices here to remark that no turn ought to have presented itself to a British admiral but the turn toward the enemy."

Admiral Jellicoe went in command of the British grand fleet after long and honorable service in the admiralty. Is that the reason why he placed prudence above daring? The doctrine of "a fleet in being" had long ago been upheld by the admiralty. Admiral Jellicoe felt that the safety of the world depended upon the ability of the British navy to prevent the escape of the German fleet to the high seas. If he failed in dashing after the enemy fleet under conditions he deemed adverse, was it not due to his long shore experience and his intense conviction that he must, at all hazards, preserve British superiority in ships on the sea?

## On Shore Too Long

I remember some years ago that a certain naval officer who stood high in the service, went in command, of a battleship after three years of shore duty.

"How is Capt. Y—getting on?" I asked Admiral Fletcher, then commander-in-chief of the fleet.

"He has been on shore too long," replied Admiral Fletcher. "There is but one way to be a successful, ready and quick captain of a ship, and that is to practice all the duties afloat."

Afterward that officer, highly esteemed was plucked.

When the time came for the United States navy to enter active war service, even before the declaration of war, I gave the positions of greatest importance afloat to men of the longest and latest experience at sea—Mayo in command of all our forces at home and abroad; Rodman in command of our dreadnaughts in the North sea; Wilson first in charge of the patrol squadron and later in command of the French coast, protecting our transports; Gleaves in command of the cruiser and transport force, safeguarding and carrying our soldiers overseas; Rogers in command of dreadnaughts watching for German raiders off the British and French coasts and others of long seagoing experience.

## Greatest Error of Allies

What was the biggest naval error of the war committed by the allies?

I think the answer is plain and easily understood now by both expert and layman: It was the failure to erect, at the beginning of submarine warfare, back in 1914-15, effectual barrages across the North sea and the English channel, in the Mediterranean and at the entrance to the Adriatic sea. If efforts had been directed to this end sinkings by submarines would have been greatly lessened and ended long before the combined naval forces were equal to the big job of making U-boat warfare unsafe.

The deeds of the destroyers and other naval craft glorify the world war. But if the day war was declared, as the first naval offensive in that area, the French and British had made the channel from Dover to Calais impossible of passage by an enemy submarine that would have been supreme and effective strategy.

If barrages, such as we afterward laid across the North sea, had been erected there and across the straits of Otranto, the U-boats would have been so hemmed in that Germany would have realized early in the struggle that she could not hope to win the war by their use. Millions of tons of shipping would have been saved, and it would have changed the whole trend of the war at sea.

## Errors in Plenty

There were plenty of errors—navy and army—on both sides of the Atlantic—errors made by able and patriotic men, as there always are.

Some will ask, Why should error be discussed now that the war is over, and all the allied and associated powers did so well? Admiral Beatty furnishes the answer in these words:

"We may make mistakes, and it is our business today to see that the lessons have been taken to heart, and that we shall not again be found in such a state that we have to face the greatest crisis in history with improvised methods working from hand to mouth. It may be said that the result was good enough with such methods; but was it? We have surely no right to continue to rely on improvisations. We in the

navy know well our defects and it is our business to face them, to leave no stone unturned to avoid a repetition of the mistakes from which we have suffered in the past."

(Another article by former Secretary Daniels will be printed next week.)

# LIVE STOCK NEWS

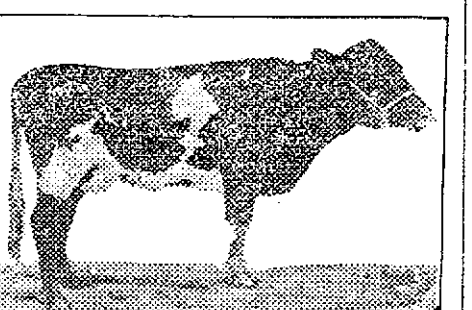

## PLAN USING PUREBRED SIRES

Campaign Being Waged in Kansas to Replace Scrubs in All Classes of Farm Live Stock.

(Prepared by the United States Department of Agriculture.)

The use of scrub sires is costing farmers of the Sunflower state \$16,000,000 annually, say live-stock specialists of the United States Department of Agriculture. Less than one-tenth of the farms in Kansas are using purebred sires of any kind. Surveys were made in 20 representative counties with results showing the number of farms using purebred sires ranged from 8.3 to 11.6 per cent. Many communities and townships reported no purebred sires in use.

In one county surveyed there were two townships in which not a single purebred bull, stallion, ram, or boar was reported. In several counties where good purebred herds were found neighboring farmers were still using scrub sires. A large per cent of male offspring had been sold to go to

A Scrub Cow Is Not Worth Her Keep.

other counties or states. In some communities an active breeder had placed purebred sires on the farms of many neighbors. For the most part farmers have failed to appreciate the advantages of using a purebred sire to increase the marketing returns from their live stock.

These conditions, announced R. W. Kiser of the extension service, Kansas State Agricultural college, are responsible for the active better-sire campaign now being waged in 20 counties and which will be extended to include all counties within the year. In every county object lessons, on the value of the purebred sire in improving farm live stock are to be found, and often on adjoining farms. Meetings arranged by the county agent through the county farm bureau and sponsored by the local live-stock improvement associations are held on these farms and the people attending see for themselves the difference between scrub sire and purebred sire offspring.

County agents directed by A. L. Clapp, the assistant county agent leader in charge of the project work, and assisted by the specialists of the extension service, are planning for intensive follow-up work in those counties where the campaign was conducted. Associations are being organized for the purpose of advancing the cause of better live stock. Bull clubs, cow clubs, calf clubs, pig clubs, boar clubs, sheep clubs, and stallion associations are in demand in every county.

High land values, the market demand for stock of good quality, the greater earning power of well-bred stock, are responsible for activities in replacing scrub sires in all classes with purebreds.

## GENTLENESS IS GREAT HELP

Loss Due to Digestive Troubles Caused by Excitement and Fear Can Be Avoided.

The practical value of treating live stock kindly is discussed by a Virginia live stock owner in a letter to the United States Department of Agriculture. "All cattle buyers," he remarks, "know how great is the 'drift' in shipping cattle. Very much of this loss is due to digestive troubles caused by excitement and fear incident to travel.

"Keep all live stock as quiet and make them as gentle as possible and your feeding costs will be noticeably reduced. Try this suggestion with one litter of pigs."

"It will abundantly repay any live stock breeder," he adds, "to spend a great deal of time going out quietly among his animals and letting them make the advancements. He will be surprised how soon he can begin to put his hands on them. After they realize his hands are not to be dreaded they will soon enjoy gentle rubbing or scratching. When animals are sheltered from annoying or exciting occurrences they digest feed better and it takes much less to keep up normal growth and fat production."

## Lacquer Substitute.

A new substitute for glass or for lacquer has been invented in Germany. It can be cut with shears or with a knife and when heated to more than 100 degrees Centigrade, it forms a kneadable mass which resumes its previous hard state on cooling. It is called "ceiton."—Indianapolis News.

# FARM POULTRY

## EXERCISE BEST FOR POULTS

Confining Young Turkeys Does Not Result in Marked Success—Thrive on Free Range.

(Prepared by the United States Department of Agriculture.)

Plenty of exercise is essential if the turkey poults are to thrive, say poultry specialists of the United States Department of Agriculture. At all times, when rain or dampness does not prevent, the poults should be allowed to run in and out of the coop at will. Too much stress cannot be given to the necessity of exercise, and the only way to provide for this is to allow the poults at every possible opportunity to range for feed outside the coop. During a long-continued rainy season it is better to allow them to run out of the coop whenever it is not actually raining, even though the grass is somewhat damp.

By confining the mother hen to the coop she will always be ready to hover

Let the Turkeys Have Open Range.

the poults whenever they run to her, which they will do if they become chilled. The greatest care should be taken to keep the interior of the coop dry, and for this reason it is advisable to choose a sandy slope where the water runs off quickly and where there is also protection from heavy rains. If necessary, the mother-hen can be confined to a roomy coop for a week or more, provided she is properly fed and watered, and the coop moved to fresh ground every day.

If the weather is warm and dry, as frequently happens when the poults are hatched late in the season, no shelter is required, as they do better in the open; but it is advisable to keep them within a fenced inclosure for the first three or four days until they are strong enough to follow the mother. Weather conditions being favorable, the hen and brood can be given free range after the third or fourth day, but care should be taken to keep them out of heavy dews and to protect them from rain for the first two or three weeks. After this early morning dews or light showers followed closely by warm sunshine will do little harm, as the poults soon become warm and dry. If cold, damp weather sets in, however, they will need to be kept in dry quarters, for nothing is more fatal to young poults than wet and cold.

When about six weeks old, the young turkeys are old enough to go to roost. Practically all turkey raisers allow the birds to roost in the open trees or on fences or other roosts especially provided for them. In sections where high winds prevail, it is customary to build the roosts next to barn or shed, where there is some protection. When this is done posts are driven into the ground and poles laid across them four or five feet from the ground. By driving them to the roosting place and feeding them there every evening just before dark, young turkeys can be made to roost wherever desired. For the first few times it is sometimes necessary to keep them under the roost until dark, but they will finally fly up, and after a week or so will no longer have to be driven, but will come up every night to be fed and to roost.

During the summer and early fall turkeys can find an abundance of feed on the average farm. Grasshoppers and other insects, weed and grass seeds, green vegetation, berries, and grain picked up in the fields all go to make up the turkey's daily ration. When this natural feed is plentiful very little need be added until fattening time, except for the purpose of bringing the turkeys every night to roost and to keep them from straying from home. For this purpose one feed of grain every night just before roosting time is sufficient.

## POULTRY NOTES.

Outs are as good an all-round feed as can be had but should not be fed exclusively.

The best tonics you can give your stock are fresh air, exercise and a variety of foods.

Kerosene the roosts, upper and under side, once a week. Also the nests every couple of weeks.

Idleness cannot be classed as a disease, but it certainly is a condition that quickly leads to disease and lack of thrift.

Number Ten is the Best Blood Purifier made.

A Fifty-cent bottle contains a two-months treatment and spring is the best time to use it.

Efforts to "square the circle" date back to remote antiquity. The problem is discussed in the oldest mathematical document extant, the Rhind Papyrus, the date of which is about 2000 B. C.

# A Good Time to Buy for Christmas

## ALTOONA'S NEXT COMMUNITY DOLLAR DAY

Wednesday, November 16th

Every person in this county will read this announcement with keen interest and anxious anticipation for this well known merchandising event.

Members of the Booster Association have been making preparations ever since the August Dollar Day in order to make this one eclipse all others.

Stocks have long since been cleared of goods purchased at high prices and in preparation for this Dollar Day Booster merchants have been able to take advantage of the lowest possible market prices now prevailing.

You remember the August bargains—the crowds of eager buyers who knew values and crowded the stores to capacity. Well—thousands of people will take this opportunity to load up with things suitable for Christmas gifts, because prices, qualities and quantities will be unbelievable.

Bring the family; stay the day. Take your lunch to the Community Rest Room at 12th Avenue and 15th Street, in Christ Reformed church building. You will be made welcome.

The crowds will be out early, so you must be here on time if you want your share of the wonderful values.

### Altoona Booster Association

## PENNSYLVANIA STATE ITEMS

New Kensington.—Two men entered the store of J. A. Seigel and stole four fur coats valued at \$250.

Scottsdale.—Found dead at the side of her bed in a kneeling position, Mrs. Helen Shurer, aged 58, wife of William Shurer, of Everson, just across the Westmoreland county line, is believed to have spent her last moments in prayer. Mrs. Shurer had been ill only a short time. She is thought to have dropped to her knees in prayer when stricken.

Harrisburg.—Thousands of dollars will be distributed by the state highway department during the remainder of the year to townships of the second class for construction of bridges or roads in accordance with state specifications. The payments this year will be extensive, and there will be more next spring as a result of inspections to be made the remainder of the year.

Hazleton.—Hazleton Post, No. 76, American Legion, turned over \$4148.64 to the fund for the furnishing of the nurses' home at the State Hospital, this sum being half of the net proceeds of the home talent open-air carnival held this fall by the Legion, which will retain the balance.

Altoona.—A headquarters company for the Second Battalion of the 110th Regiment, P. N. G., has been organized here.

Mauch Chunk.—Merchant Frank Breukers, of East Mauch Chunk, has a better opinion of humanity since an occurrence, when a former resident who left the town twenty-seven years ago returned for the first time and gave Breukers a \$100 Liberty bond in payment of an old debt of \$86 for groceries. The man, whose name Breukers refuses to reveal, said he had vowed he never would return to East Mauch Chunk until he was able to pay the bill. The merchant had forgotten all about the man and the bill, but recalled both with the visit of the former customer.

Greensburg.—Smith Welmer, of Ligonier, is in the lock up there pending the outcome of the shooting of Paul Hoffman, a lad of the same town, who is in a critical condition, suffering from gun wounds. Hoffman and a party of boys were celebrating Halloween by throwing corn and ringing Welmer's doorbell. Welmer became enraged and, it is said, seized his shotgun and fired into the crowd. Hoffman was the most seriously injured, thirty-eight shot having embedded themselves in his body and limbs.

Greensburg.—George L. Harrington, of Apollo, was held for court on a charge of using the mails in a scheme to defraud, following a hearing before United States Commissioner Knox. It was alleged that he sent threatening letters to business men of Vandergrift, demanding money on pain of death.

Shamokin.—Five miners were seriously burned by an explosion of gas at the Cameron colliery, a Susquehanna Coal company operation, near here. The victims were Anthony Fical, Walter Gimbel, Joseph Volas, John Andrews and Thomas Bomboski. The explosion occurred when one of the miners opened a safety lamp.

Mount Carmel.—Searching for a burglar he heard in his home at three o'clock in the morning, Belle Belinski found him and received a terrible beating on the head. A doctor is attending Belinski and the police are searching for the owner of clothes he tore from the burglar in the struggle.

Hazleton.—Wages of the 4000 stripping workers in the Lehigh coal field will remain the same for the next two years, under the terms of an agreement signed here by the contractors and representatives of the union.

Mount Carmel.—D. J. McCall, of Cradocks, Va., while running a temporary 440-volt line to his tent was electrocuted. He was foreman of a camp of Phoenix Utility company electricians who are erecting a line from Hauto to Shamokin to carry 66,000 volts.

Altoona.—Checks were sent to John Schaub and Frank Wilson, two Greenville schoolboys, by the Altoona & Logan Valley Electric Railway company as rewards for warning the motorman of an approaching car that an automobile was lying on the tracks, following a collision with a truck. The fog was so dense the motorman could not have seen the car until too late to avoid a wreck. Two men were working under the car at the time.

Lewistown.—Ben Avar, of Middleburg, who was convicted of bootlegging and transporting liquor from Snyder into Mifflin county in a car wrecked at Reedsville about a month ago, was sentenced by Judge Bailey to two years in the county jail and fined \$500, and Samuel Long, one of his partners, was given fifteen days and fined \$100.

Lock Haven.—A large consignment of yearling catfish from the state hatchery at Cory were placed in Bald Eagle Creek, near here.

Irwin.—Charles Seibert, 42 years old, and single, committed suicide by hanging in the stairway of his home near here.

Altoona.—So successful has the municipal market proven that the commissioners are planning a permanent building for it.

Greensburg.—Charles Zuehlke, of Whitney, was committed to the Westmoreland county jail charged with having fired his own home.

Altoona.—Lieutenant William Lattimer, of the Pennsylvania railroad police, and City Detective J. Warren Hauser have agreed to contribute their shares of the \$1000 reward offered by the Blair county commissioners for the arrest and conviction of the murderers of William E. Niehaus, of McKeesport, in Altoona, August 3, to a fund to provide additional furniture and playground equipment at the Children's Home, maintained by the county at Williamsburg, provided the others entitled to share will do likewise. Approximately 50 persons will get portions of the reward if it is distributed. Gilbert McCloskey was convicted of first degree murder and Edward You and George Lafferty of second degree murder for killing Niehaus.

Reading.—Asking for immediate action toward the correction of abuses in the sizing of domestic coal, City Solicitor Wellington M. Bertollet, secretary of the Pennsylvania Retail Coal Dealers' Association, has addressed a letter to S. D. Warriner, chairman of the General Policies Committee, Anthracite Operators' Association, Philadelphia. He states that the public is unwilling to pay chestnut prices for pea and pea prices for buckwheat, and, as a result, there is an enormous amount of tonnage in the local yards, tying up a large amount of cash for the retailers. He says in some instances pea is merged with chestnut, resulting in an abnormal demand for stove coal.

Pottsville.—William Walbridge, aged 43, one of the oldest and most trustworthy employees of the Philadelphia & Reading railway here, was instantly killed in front of a large crowd of horrified spectators at the local station when he stepped in front of a moving train to repair a loose plank.

Scranton.—Mrs. Samuel Evans, of Taylor, was appointed a deputy sheriff of Lackawanna county by Sheriff Schlager. She fills the vacancy in the sheriff's office caused by the death of her husband, who was killed by an alleged bootlegger near here several months ago.

Marietta.—Scalded by the contents of a pumpkin pie, Viola Burntitt, of Mountville, aged 8 months, died in agony. An older sister was carrying the pie and spilled the contents over her sister's head.

Brownsville.—One man was drowned and three others experienced a narrow escape when the rowboat in which they were crossing the Monongahela river at Alicia overturned. Victor Swift, aged 20, an employee of the Alicia Supply company, was the victim. He with George and Isaac Conway and George Schinsky were returning from a dance at Denbo, Greene county, when the boat overturned. All started to swim for the Fayette county side and three arrived safely. In the fog it is believed that Swift became confused.

Brownsville.—Monroe Huffmaster, a railroad crossing watchman at Ten Mile Run, near here, is in jail charged with shooting Clarence Spence, who is in a Brownsville hospital with a wound in the lung. According to reports to the authorities Huffmaster fired at some men when they moved toward him after he had ordered them off railroad property. Huffmaster reported to railroad officials that the men attacked him and he fired, wounding Spence.

Pottsville.—The school board took extreme steps to compel state aid in order to pay the cost of a new school building. The board also ordered the withholding of funds. The school board decided that until the state pays the money due no more state taxes will be paid. State officials notified the board that more than \$1000 is due from the district for the teachers' retirement fund but this, like other amounts, will not be paid until the state makes a settlement.

Stroudsburg.—One thousand automobiles and many thousands of people of Monroe and Lackawanna counties celebrated the opening of the Lackawanna trail, built at a cost of \$1,250,000. Addresses were made by Lieutenant Governor Edward Beldeman and Congressman W. E. Kirkpatrick, of Easton, the member from this district. A banquet was held in honor of the event at the East Stroudsburg Normal School. The feature of the program was an elaborately staged pageant at the Stroudsburg fair grounds, representing 100 years of national and local development. The committee, composed of many men and women of the two boroughs, worked for two solid weeks in preparing the episodes and selecting the costumes.

Harrisburg.—Preliminary steps for the issuance of the remainder of the \$50,000,000 road loan authorized by the constitutional amendment of 1918, are being taken at the capital and bids for \$11,500,000 may be asked in a short time. The money will be used to finance part of the road building program in the spring.

Condit.—Struck by a trip of cars in the No. 6 shaft, William Morgan died from his injuries at the hospital.

Export.—Mrs. Mary Good, 98 years old, is in a serious condition as the result of a fall down stairs.

Bloomburg.—Struck by a cake of ice weighing 400 pounds, Richard Reilly is in the Bloomburg Hospital with a broken leg.

Sunbury.—Work was started on a \$250,000 six-story building for the Sunbury Trust and Safe Deposit company.

Lancaster.—The court appointed 14 special policemen for the Pennsylvania railroad.

Uniontown.—Unable to open a small safe in the residence of Jasper Augustus, a burglar operator, burglars removed the safe and carried it away.

## HELP THE KIDNEYS

BEDFORD READERS ARE LEARNING THE WAY.

It's the little kidney ills—The lame, weak or aching back—The unnoticed urinary disorders—That may lead to dropsy and Bright's disease.

When the kidneys are weak. Help them with Doan's Kidney Pills.

A remedy especially for weak kidneys. Ask your neighbors. Doan's have been used in kidney troubles for 50 years.

Endorsed by 50,000 people—endorsed at home. Proof in a Bedford citizen's statement.

Mrs. J. C. Manges, W. Pitt St., says: "Some time ago had a bad spell of kidney complaint which caused my back to become weak. I could hardly do my housework on account of the pains in my back which were there constantly. I started the use of Doan's Kidney Pills and gradually my back became stronger and my kidneys normal. It was not long before this medicine cured me and I haven't been troubled since. I cannot say too much for this medicine.

Price 50c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Manges had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

For Plants. Add a few drops of ammonia to the water with which you water your house plants and you will find them growing better.

## ROUND KNOB

The rains of the past week have filled the springs and wells with water.

Hunting season has opened at last with lots of shooting. Wade H. Figard was one of the first to bring down a turkey. He killed a fine big hen weighing 16½ pounds at long range.

Carlos O'Neal is at Petersburg visiting his parents, Mr. and Mrs. Cam O'Neal, where he expects to hunt for a few days.

Dorothy Thomas, who has been employed at Raymond Figard's visited at the home of her parents, Mr. and Mrs. Silas Thomas on Sunday last.

Mrs. Mike Goworty, Mrs. Ray L. Figard, Mr. and Mrs. George Mort, Mr. Carlos O'Neal, James Porter and Jennett Thomas visited at the home of Raymond Figard on Sunday last.

Blair Mort and Gilbert Thomas and Reuben Thomas visited at the home of Wade H. Figard on Sunday last.

The exercise held at Round Knob school were very largely attended and a very entertaining program was rendered.

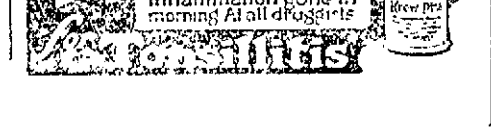

Roy L. Figard, who has been suffering with an abscess on his nose is reported some better at this writing. The Road Board met at Albert S. Figard's on Wednesday to transact their monthly business.

The Ladies Aid held their monthly meeting at the home of Mrs. Silas Thomas last Wednesday evening. There was quite a large turn-out and plenty of good "eats".

Harmon Wright is wearing a broad smile as the stork visited at their home and left a big boy.

Tim Horton, who recently purchased 4 acres of land from Harvey Clark is erecting a dwelling house on it.

Donald Wright, who cut his foot while working at Samuel Fords saw mill is improving some at this writing.

## CHARTER NOTICE

In the Court of Common Pleas of Bedford County, Penna.

Notice is hereby given that an application will be made to the said court, Monday, November 14, 1921, under the Incorporation Act of A. D. 1874, and the supplements thereto by L. B. Ferry, L. A. Croft, J. W. Reininger, Jacob D. Brown, Abram Kuagy, Lorenzo I. Brown, Herman Clouse, Samuel Keagy, Geo. Waters, Ellis Amick, James Croft, J. M. Henry, H. H. Harclerode and Samuel M. Croft for a charter for an intended corporation to be called Potter Creek Cemetery Association, the charter and object of which is for the purpose of maintaining a public cemetery and burial ground in Woodbury Township, Bedford County Penn't., near the public road leading from Waterside to Bakers Summit, about one and one-half miles northwest of Waterside, by acquiring land suitable for said purpose and selling lots for burial purpose and maintaining and improving a public cemetery for burial purposes and for these purposes to have, possess and enjoy all the rights, benefits and privileges conferred by said Act of Assembly and its supplements.

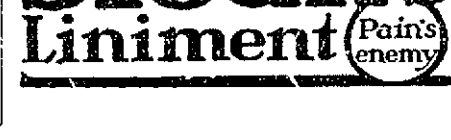

E. M. Pennell, Solicitor.  
Oct. 21—28 Nov. 4—11.

## USE SLOAN'S TO WARD OFF PAIN

LITTLE aches grow into big pains unless warded off by an application of Sloan's. Rheumatism, neuralgia, stiff joints, lame back won't fight long against Sloan's Liniment.

For more than forty years Sloan's Liniment has helped thousands, the world over. You won't be an exception. It certainly does produce results.

It penetrates without rubbing. Keep this old family friend always handy for instant use. Ask your neighbor.

## Is That Cold and Cough Hanging On?

YOU will be convinced that Dr. King's New Discovery does just what it is meant to do—soothes coughs, raw throats, congestion-tormented chests, loosens the phlegm pack and breaks the obstinate cold and gripe attack, relieves the congestion in the head. No harmful drugs, therefore good for children as well as grownups.

Right away you will notice the change for the better. Has a convincing, healing taste that you will appreciate. Buy a bottle at any druggists on the way home to-night, 60c.

Lazy People, Lazy Bowels. Don't neglect constipation. It undermines the health, takes all vim out of you. Dr. King's Pills will invigorate the system, stir up the liver, move the bowels. All druggists, 25c.

PROMPT! WON'T GRIPE  
Dr. King's Pills

## DR. FAHRNEY

Hagerstown, Maryland

DIAGNOSTICIAN

The Dr. Fahrneys have been practicing medicine and have made a specialty of chronic diseases for over 100 years. I am working only with chronic diseases—bad kinds—difficult cases—and I diagnose your case before I treat you. If you have a trouble or weakness or deformity, write to me and I'll study your case and give satisfaction.

## SERUM PREVENTS SHOCK FROM BURNS

Some extraordinarily interesting medical research work has been carried out within the last two years at the Pathological Institute, Geneva, by a young Macedonian, Dr. Anastas Zoltareff, which has resulted in important discoveries with regard to the treatment of burns.

Kotzareff's method consists in injecting serum taken from either another person or an animal previously suffering from burns. In the first place he found that by taking blood or serum from animals badly burned and injecting it into other animals in a normal condition, in repeated doses during two or three days, the injected animals afterward subjected to burns survived while others not injected succumbed. From this he deduced that the serum had given immunity. He then experimented by injecting the serum after burning and succeeded in preventing the intoxication of the organism by neutralizing the toxins.

A recent serious explosion at some nitrogen works at Bodio, in Italian Switzerland, gave occasion for testing the method on human beings, and some remarkably interesting results were obtained. The blood of a person slightly burned was injected into a person dangerously burned. In the case of a child who was burned on the back, arm and chest sufficiently under ordinary circumstances to cause death, blood was taken from a person whose hand had been burned. The child was vaccinated four times. It regained consciousness after the first injection and remained only a little over a fortnight in hospital, the burns healing with very little contraction.

In an interview with the Geneva correspondent of The New York World, Dr. Kotzareff explained how he came to make his discovery. During the war many soldiers died from what was known as traumatic shock. Researches were made at Geneva and it was found that toxins emanated from internal lesions, but that where these toxins escaped and the wound healed. Had this been known during the war incisions would have sufficed and many amputations would have been avoided.

Dr. Kotzareff was working on these researches when he remembered having read in a book by Destoyevski a description of his experiences in prison in Siberia in which prisoners who had been flogged spoke of feeling as though their bodies had been burned all over. This, said Kotzareff, is traumatic shock. He then set to work to investigate the nature of such shocks, whether nervous, whether pertaining to the blood, or whether due to poisoning.

With regard to the nerves, he eliminated this theory by testing guinea pigs with and without local anesthetics. With regard to the blood, this was done by stopping the flow of blood in a certain vein in one animal and injecting it at the same time into another. The animal in which the vein was stopped lived longer than the other, proving that the poison had to pass by another route, thus establishing the poison theory. Having done this, he set about to experiment in immunization, as already described.

Dr. Kotzareff remarked that it was possible to secure auto-immunization by the means of a series of slight burns, the organism thus learning to oppose its own anti-bodies however, this was hardly of any practical importance, as one could not anticipate the necessity. The importance of his discovery was the opposing of a serum to a chemical toxin.

Following out this idea The World correspondent asked whether Dr. Kotzareff considered it would be possible to immunize a person against toxins produced by worry or fatigue. He replied that he had lately read of experiments by which a serum taken from a person in full vigor had been injected into a person suffering from fatigue resulting in a reduction of the symptoms of fatigue. In order to pursue researches on these lines it would be necessary to have facilities in factories where every species of worker was to be found—the lazy, the conscientious and the man suffering from domestic difficulties.

John Redinger

John Redinger died at his home near Chedestown on Sunday, November 5, 1921, death being due to old age. Mr. Redinger was a son of John and Charlotte McCoy Redinger, deceased, and was born in Monroe Township on July 21, 1846, being aged at the time of his death 75 years, 3 months and 14 days. On February 14, 1867 he was called in marriage with Lucinda Calhoun. He is survived by one brother, E. Frank Grafton, W. Va., and the following children: Amanda C. Bussard Breese, survived by one brother, E. Frank, Oregon; Florence E. O'Neal, Chaneysville; Ethel V. Smith, W. Va., and Edith at home.

Funeral services were held on Monday, November 5, at 10 o'clock at the Bedford church. Rev. John Bennett officiating.

## CANCER A MUTINY OF OUR BODY CELLS

Drawing a most striking parallel between mutiny in a regiment and cancer in the human body, Dr. L. Duncan Bulkley, senior physician to the New York Skin and Cancer Hospital and member of the American Association for Cancer Researches, contributes to the Medical Record (New York) another brilliant plea for treating cancer without the knife. He pictures a regiment far away from home where transportation has fallen down, food is scarce and bad, housing is wretched, clothes are worn and insufficient, filth prevails and conditions of life become intolerable. A few soldiers—representing body cells—stir up a mutiny, others join them and propose to kill their officers. The Colonel returns, hears of the dissatisfaction and begins by shooting the ringleaders, just as the surgeon removes the riotous group of cells forming the tumor called cancer.

But the intolerable conditions continue and presently more soldiers mutiny—or more cells run riot. The trouble spreads to other regiments just as the cancer breaks out in other parts of the body, until the whole regiment or body is affected, and this ends its life.

But if the regiment has a good, kind Colonel he listens to the boys' complaints, dismisses the petty officers who were to blame for it and remedies the evil conditions. There is no shooting of men, no murder of officers, the soldiers return to their duties and the mutiny is at an end. So with cancer, as the many physicians who have treated it by remedying the diet, applying the principles of correct hygiene and medicinal treatment, can testify.

"Of course," writes Dr. Bulkley, "we have not reached the point where every case of cancer in any stage of the disease can be cured, but under sufficient and exactly proper medical management there need not be the 90 per cent. of ultimate deaths from cancer that surgeons acknowledge to be the case at present."

As to the supposed local origin of cancer, Dr. Bulkley continues his parallel of a mutiny:

"We all acknowledge that cancer of the tongue and buccal cavity arise from the local irritation of a broken or decayed tooth, but of the thousands of such that exist how very few result in cancer! Smoking, especially the use of a pipe, is accredited with cancer of the lip and mouth, but how seldom does this occur among the thousands who use tobacco! Cancer of the breast is often attributed to a blow, but almost every woman has at some time had a blow on the breast or irritation from a corset, while relatively few develop cancer."

"Applying now our simile of a mutiny of soldiers to the action of the cells forming the lesion which we call cancer, we can readily see how a local irritation may act as the exciting cause of rebellion in the soldiers or cells, against existing conditions of life, while neither the latter alone would not suffice to produce amutiny or the malignant growth—even as a spark suffices to start a great fire in combustible materials."

"The soldiers may have endured their increasing discomforts and distress without resistance or mutiny until some unjust or unkind treatment, or a blow from a Corporal or a Sergeant led them to open rebellion. In the same way the cells of a part may have long suffered nutritive and neurotic or other privations and yet have striven to perform their functions faithfully, secreting milk, gastric juice, bile, urine, &c., until some external agency gave them a shock of unusual or unjust treatment. Some local injury precipitates matters and leads them to throw off their allegiance to physiological control and action and starts them on their abnormal and riotous career. Ceasing to functionate as before in their proper glandular or other action, they still have the power of growth and reproduction, and a useless malignant neoplasm is formed."

Dr. Bulkley closes by insisting that cancer is a constitutional and not a local disease, and that when taken early the local lesions disappear and regain almost as long as the conditions that caused them do not return.

## PRACTICAL AND NEW USES FOR RADIO

Among the new uses which wireless telegraphy is being put are the following:

The Westinghouse Electric Company now mounts a sensitive wireless receiving outfit on an auto truck using a loop aerial as antenna. And what do you suppose they do with it? They run the truck parallel to a high tension line to discover the leakage of the insulators! Wherever there is a bad leakage, the crackling sound in the receivers of the radio outfit will reveal the energy going to waste. An insulator may look all right from the outside, but it might be porous and thus waste a lot of the company's power. The radio receiver will detect the bad insulator immediately.

"Then we have power companies in the West which are now opening and closing switches in distant sub-power plants by radio. Instead of keeping an operator at each one of their substations to throw the switches in and out, this is now accomplished without the touch of human hands."

## CARD OF THANKS TO VOTERS OF BEDFORD TOWNSHIP

I wish to thank all the voters and loyal friends who supported me in the General Election last Tuesday for the Office of Tax Collector. We fought a good fight.

Robert P. Amos

Down With the Aristocracy! The mosquito is an aristocrat—some of the best in the country.

## ANTHRAX DUE TO HOME-GROWN HAIR

The recent death of a man in New York from anthrax contracted from a new shaving brush makes the following from the New York Medical Journal of more than usual interest. "Anthrax is usually found among imported hair. This, a statement believed by the general reader, is disputed by the Census Bureau, mortality statistics showing a gradual increase in the yearly total of fatal cases of anthrax in rural districts. Often ignorance, or dislike of loss, will lead a man to sell a skin rather than burn or bury it as required. Washing the hair in hot alkali soap solution, as recommended by the Bureau of Animal Industry, does not protect the washer, nor keep the stock rooms from becoming infected. "The English urge of disinfecting imported hair is urged by Dr. Henry F. Smyth (Journal of Industrial Hygiene, March 1921) as the best. Government disinfecting plants are stationed at one or more ports of entry. All imported hair and all from anthrax areas is disinfected by standard methods before entering domestic commerce, the cost of disinfecting being charged against suspected materials. By this plan not only are hairdressers protected, but also any handlers, draymen, laborers, hair curlers, hair cloth weavers, tailors, milliners, brush makers and the man taking his morning shave."

## NEVER LET ENGINE RUN IN CLOSED GARAGE

With the onset of cold weather comes the open season for fatalities resulting from carbon monoxide poisoning by inhalation of the exhaust gas of automobile engines running in small closed garages. The last few years have seen a gradual increase in death resulting from this peculiar combination of circumstances. Cases have been reported which involve inhalation of gas from both gasolene heaters as well as from bath room launches and automobile engines.

The gas responsible, carbon monoxide, is one which quickly overcomes persons exposed to it above certain concentrations, so that it has been important to determine the limits necessary to cause fatality. In an endeavor to determine this necessary concentration and exposure, Prof. Yandel Henderson, with the aid of a number of colleagues, carried on some studies preliminary to the problems of ventilation involved in the proposed vehicular tunnel under the Hudson River.

Among other conclusions reached by the experimenters, the most important was the determination that when the time of exposure in hours multiplied by the concentration of carbon monoxide in parts per 10,000 of air equals three, there is no perceptible physiologic effect. When it equals six, there is just a perceptible effect; when it equals nine, headache and nausea are induced; when it equals fifteen or more, the conditions are dangerous to life. If a motor car should give off one cubic foot of carbon monoxide per minute in a closed room 10 by 10 by 20 feet, the atmosphere would reach the dangerous concentration of fifteen parts in 10,000 in three minutes.

Experience has shown that the running of a motor car in a closed garage for testing or warming up is a dangerous procedure. Scientific evidence reveals the reason for the danger and the narrow limits of safety surrounding the inexperienced motorists who indulge in this hazardous performance.

## WEEK BLOOD IS A REAL BARRIER

## GROWING CHILDREN OFTEN NEED GUDE'S PEPTO-MANGAN

Some children grow too quickly—it saps their strength. They lapse into careless, desultory habits, or develop a shrinking attitude. Their faces look pinched.

The blood becomes overtaxed by too rapid growth; and poisons from the system take the place of strength-giving red corpuscles in the blood. Red corpuscles are these little red particles that swim in blood and give it its color. Gradually that child loses interest in play.

Poor blood needs the building that iron in Gude's Pepto-Mangan gives to weakened blood. Gude's Pepto-Mangan enriches the blood by increasing the number of red corpuscles, and restores the blood by driving out the poisons. When the revived blood gets to work, the appetite becomes what a growing child's should be. Your druggist has Gude's Pepto-Mangan in liquid or tablet form. The name "Gude's Pepto-Mangan" is on every package. Advertisement.

## WIND-GENERATED ELECTRICITY STORED

An electric plant operated by a windmill has been erected after two years of experimenting by the Perkins Corporation and the Westinghouse Electric Company. It is in Indiana, and every known instrument for measuring velocities is in use for recording results both of velocity and of current generated.

These prove that it is possible with no power but that of the wind to generate and store enough electricity for the needs of the average farm. The outfit has a wind wheel at the top of a fifty-foot tower. This works the generator, and the electricity is turned into a storage battery.

## ST. JOHN'S REFORMED CHURCH

Rev. J. Albert Eyer, Pastor. Sunday School 9:45 A. M. Divine worship 11 A. M. Pastor's Subject: "Why Disarm?" Divine worship 7:30 P. M. A cordial welcome is extended to all to worship at St. John's.

## DIDN'T SEE WELL DAY IN 21 YEARS

Reading Man Gained 15 Pounds Taking Him Now and Friends Hardly Know Him Now.

"Honestly, people hardly know me since I have been taking Tanlac and numbers have asked me what I have done to have such a big change," said Robert Haines, 329 Greenwich St., Reading, Penn. Mr. Haines for the past twelve years has been a box-maker for the Standard Box Factory, has lived in Reading all of his life and is widely known and highly respected.

"I had La Grippe in 1899 and from that time to this had never known a well day. It left me in an awful rundown condition with my stomach out of fix and no appetite. For years I didn't eat a single hearty meal, and what little I did eat either nauseated me or bloated me up so I would gasp for breath. I lost weight right along and grew so weak I was almost past going."

I got so nervous and miserable I actually dreaded to see night come. I slept so poorly I would get up in the morning all tired out and would drag myself to work most of the time without taking even a bite to eat. I was in a nervous condition, worrying over my troubles.

"The first bottle of Tanlac didn't seem to do me much good but before I finished the second bottle I was on the road to health, and for the first time in twenty-one years I am able to eat a hearty meal, and I've gained fifteen pounds in weight, too. I feel fine and dandy all the time and I never pass the Tanlac drug store that I don't feel like throwing up my hat and shouting, 'Hurrah for Tanlac. It's got the world beat.'"

## LITTLE PLANES ON BIG ONES' WINGS

Experiments with a remarkable type of battleplane which carries its own scout machine poised at the tip of one of its wings have been carried out at Farnborough, England, says the Scientific American. Two big bombing planes have been flying over Aldershot with a diminutive airplane fixed to the upper wing. So far it is understood that the tests have been successful. The parent machines have traveled at their usual pace, although the engine of the scout machine was kept running so that it was ready to dive off at a minute's notice to protect the large and heavier craft.

An expert pilot is carried by the bombing plane and as soon as his services are required he climbs through the top wing and takes his seat in the scout plane. By pressing a trigger he frees the smaller machine, which at once glides along the battleplane wing and dives off.

## NEED CHEAPER NURSES, URGES DR. MAYO

Any intelligent girl can acquire in two years all the knowledge necessary for the thoroughly competent nurse, said Dr. Charles H. Mayo, of Rochester, Minn., in a recent interview.

He was attacking the organizers of trained nurses and the extravagant requirements of most States for diplomas. "Seven dollars a day for an eight-hour day is more than exorbitant—it is prohibitive," he said, for in cases of dangerous sickness it means \$21 a day, a price beyond the reach of persons in moderate circumstances and prohibitive to hospitals.

Dr. Mayo urges the training of subnurses or nursing aids, who will accept smaller pay, whose demands are not so exacting, and who will be proficient enough to take hold of almost any case presented to them."

## DEATH DUE TO OUR COMPLEXITY

It seems such a mystery that creatures which consist of a single cell may never die, while higher animals and plants are limited to a life of a few years. The explanation is to be found in the very complexity of these higher forms of life. Says the Journal of the American Medical Association:

"Protozoa may in a sense be immortal. Germ cells are likewise immortal. The modern transplantation experiments have demonstrated that certain somatic cells, such as tumors contain, may continue to live and grow indefinitely. But by their specialization the higher forms forego the power of independent and indefinitely continued existence. This is the price paid for the differentiation of special functions. Thus, says Pearl, if in such an interlocking and mutually dependent system any one part through accident or in any way whatever gets deviated from its normal functioning, the balance of the whole system is upset. If the departure whole system from its normal functional course is great enough to be beyond correction promptly through the normal regulatory powers of the organism, death of the whole will surely ensue."

## Friend's Cove Reformed Charge

Rev. R. R. Jones, Pastor. The Cove Church.—Sunday School at 9:30 and church service at 10:30 a. m.

## DUNNING'S CREEK CHARGE

Armistice Day service in the Friend's church, Fishertown, November 11 at 7 p. m. This is to be a union service. The Home Mission service as follows: November 13, Pleasant Hill, at 10 a. m.; Fishertown, at 2 p. m.; St. Paul's at 7 p. m.

## EAT ZWEIBACH

And get your stomach toned up for the Big Community Dinner.

Bedford Sanitary Bakery

## OHIO ENDOWMENT MORTGAGES

Pay well and are as safe and convenient as government bonds. We collect and remit interest semi-annually and guarantee prompt payment of both principal and interest. Administered under Ohio State supervision. No Ohio tax for non-residents. For particulars address,

THE OHIO INDUSTRIAL ENDOWMENT FUND COMPANY, Columbus, Ohio.

## CLASSIFIED ADS

When you are in need of building material, sash, shingles, wallboard roofing, siding, flooring, rail board, beaver board phone or call on the Davidson Lumber Co. Don't send to commission houses to buy your material. Buy it at home and you can see what you are getting—better goods. These men don't pay any money into your churches or Sunday School. It is doubtful if some of them know what the inside of a church looks like.

Davidson Lumber Co.

July 1 to

## WANTED

Man with car to sell low priced GRAHAM TIRES. \$130.00 per week and commissions. Graham Tire Co., 2928 Boulevard, Benton Harbor, Mich.

Nov. 11 \*

R. N. Oppenheimer,

Bedford, Pa.

Aug. 12 to

## ESTRAY NOTICE

2 yearling jersey heifers strayed away from the farm of Elwood Williams at Rainsburg, Pa. Any information as to their whereabouts will be appreciated by Mr. Williams.

Nov. 11-18 \*

## TRESPASS NOTICE

No hunting allowed on the lands of the following: Blair Ott, Paul Pensyl, Earl Hinton, Ambrose Crisman.

Oct. 28, Nov. 11 \*

## WILL SELL OR EXCHANGE

3 good automobiles in first condition for good horses or mules. Also horses and vehicles, new and second hand harness of all kinds.

Stiver's Stables.

Nov. 4—18\*

A community's development is never greater than the co-operation of its citizens. You and You and You, and lots of other You's, pulling for the Bedford Chamber of Commerce will put the Greater Bedford Movement across in a big way.

## U. WARNS AGAINST FOREIGN SECURITIES

Washington, Nov. 6.—American investors were warned tonight by the Commerce Department to exercise care in purchasing foreign bonds payable in depreciated currencies in the expectation of realizing enormous profits when exchange values return to normal.

This, the department added, is the case with the currencies of Germany, Austria, Poland, Czechoslovakia, Roumania, Jugo-Slavia and Hungary.

3% AND SAFETY 3% Hartley Banking Co. BEDFORD, PA.

Oldest Bank in Bedford County

## THREE STATES PASS OUT OF HAND OF REPUBLICANS

New York, Maryland and Kentucky Swing back into Democratic line.

## DEMOCRATS SWEEP NEW YORK CITY

In Greater New York City, John F. Hyland, Democrat, was elected mayor with a plurality of at least 400,000 over his Republican opponent, Henry H. Curran. This is one of the greatest victories the Democrats ever had in the city of New York and with this landslide it carried every Democratic nominee into office by pluralities reaching from 200,000 to 400,000. The tremendous majority for Townsend Stander, for Court of Appeals of the State, given in the city will win the state for the Democratic candidate over his Republican opponent. The Democrats seem to have swept all the county tickets and most of the cities and boroughs though the Republicans hold the majority in the Legislature.

In Maryland the Democrats regained control by electing Gordy State Comptroller and the Democrats will also have large majorities in both houses of the Legislature. Allegheny County, which includes Cumberland, elected Albert A. Doub, Republican, candidate for Associate Judge by a majority of over 1,000, which is a tremendous falling off compared to last year's vote.

Kentucky had a landslide for the Democratic ticket. Two years ago the Republicans carried the state and had a clear working majority in the State Legislature, but last Tuesday the Democratic party swept the state and brought the control of the Legislature back into the hand of the Democrats. The only place where the Republicans held their own was in Louisville, where the Republicans carried everything. Several counties, long known as Republican strongholds, gave Democratic majorities for the first time in many years.

In Cleveland, Ohio, Fred Kohler was elected Mayor over William S. Fitzgerald, Republican, the official returns giving him a plurality of 4,190 votes in a strong Republican city.

Virginia, of course, went Democratic.

Syracuse, New York, turns Democratic for the first time in twenty years by electing a mayor on the Democratic ticket by a majority of at least 6,000.

Albany, New York, a Republican stronghold, elected a Democratic mayor.

Johnstown, New York, went strongly Democratic. The huge pluralities are highly indicative that the people everywhere are tired of the dilatory tactics and unfulfilled promises of the Republican party.

## GREEN MUSIC EASY ON EYE

Musical printed on dark green paper, with the notes and staff in white, is being used to reduce eye strain, says Popular Mechanics. It is particularly designed for use in theatres, where bad lighting causes unusual strain on the musicians' eyes. In semi-darkness the notes seem to stand out in relief.

On purchases of \$25 or over, we will refund your carfare from any point in the county.

# FIFTEEN DAY

Also, on similar purchases by auto owners, we will refund price of gas.

## Great Mid-Season Sale

### Began Wednesday, Nov. 2, 1921

AT  
**HAROLD S. SMITH CO.**  
**BEDFORD, PENNA.**

**Big reductions on entire stock of Clothing, Shoes, Ladies' Ready-to-Wear, etc.**  
**EVERY ARTICLE IN OUR STORE REDUCED--NOTHING RESERVED**

The "big idea" in this Sale is to "give something" to our customers. That may sound like cheap talk. Not a bit of it! Its the greatest business building idea we ever got hold of. What are we giving?--the biggest bargains ever offered to the people of Bedford County!--and right in the heart of the Fall and Winter season. We are giving you the opportunity to save 10, 20, and, on some articles, as much as 35 and 50 per cent.

**Come in and let us show you the POWER OF THE OLD-TIME DOLLAR.**

NINE CREOSOTE OIL  
FROM GAS TANKS

The "sweat" of gas tanks is the ointment of bungalows. A creosote oil which condenses on the inside walls of gas tanks and trickles down is found to make an excellent shingle stain oil. It penetrates rapidly and dries quickly, and is an excellent solvent for stains and preservative for the wood.

To the gas companies it is known as holder oil, once almost a nuisance. The color ranges from amber and ruby to ebony. By keeping it reasonably light and clear companies are able to sell it to jobbers and wholesalers for from 5 to 10 cents a gallon. Goodness knows for how much they sell it to the public!

When painters learn to buy this oil from the local gas companies they will find the cost of materials for painting a shingle house only a small fraction of that for clapboard houses.

FAT MAN STUCK  
THREE DAYS IN CAVE

A recent order, by which all persons having a waist measurement of more than 33 inches, are until further notice, excluded from the Crystal Caverns, one of the famous attractions of the Sequoia National Park, California, has its explanation in a recent accident of curious nature, says Popular Mechanics. A man of more than average girth attempted to enter the cave, which is reached through a narrow crack between the rocks. He succeeded in pushing in, but reached a point where he could neither go ahead nor turn back, and was held a prisoner between the rocks.

After three days without food, he had lost enough weight to enable forest rangers to free him by chipping away the rocks around him. The cave entrance is now to be widened sufficiently to prevent the repetition of such an accident.

## FAMILY TRAITS TO

## DECIDE INHERITANCE

"Our knowledge of the inheritance of physical traits is sufficiently precise to be applied practically to cases of doubtful parentage," said Dr. Charles B. Davenport in an address at the recent Eugenics Congress in New York. "If the child, the known mother and both of the putative fathers can be seen and some inquiry be made as to family stock of the three adults, a decision can generally be rendered with a high degree of certainty, ranging from 75 to 90 per cent. For, usually, there will be not one critical trait merely, but several traits, whose combined evidence will be overwhelming."

"Already the Eugenics Record Office has been asked to answer certain questions about the inheritance of traits in a case of a claimant who maintained that he was the son of a wealthy man who died without known heirs."

## CHARTER NOTICE

Notice is hereby given that an application will be made to the Governor of the State of Pennsylvania on Tuesday the sixth day of December A. D. 1921, by John M. Haren, Banner B. Chisholm, James Mack, Eben H. Pennell and Edward M. Pennell under the Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to provide for the Incorporation and regulation of certain Corporations" approved April 29, 1874 and the supplements thereto for the charter of an intended Corporation to be called Shermans Valley Coal and Lumber Company, the character and object of which is to be the cutting, manufacturing, purchasing, selling, shipping and the mining, shipping, purchasing and selling of Bituminous Coal and for these purposes to have and possess and enjoy all the rights, benefits and privileges of the said act of assembly and its supplements.

D. M. Pennell,  
Solicitor.

ELECTRIC LIGHT COMPANY  
WANTS ANOTHER INCREASE  
IN RATES. WHO CARES?

The Bedford Electric Light, Heat and Power Company, furnishing electric service in Bedford Borough and Bedford Township, Penna., has filed with the Public Service Commission to become effective December 15, 1921, a new tariff which makes the following increase in existing rates.

**INCREASE**  
Rates for power on meter basis have been increased as follows:  
From To  
100 to 200 kilowatts 6.5c to 7.5c per kilowatt  
200 to 400 kilowatts 6c to 7.5c per kilowatt  
400 to 600 kilowatts 5.5c to 6.5c per kilowatt  
600 to 800 kilowatts 5.2c to 6c per kilowatt  
800 to 1000 kilowatts 5c to 5.5c per kilowatt  
1000 to 1200 kilowatts 4.5c to 5c per kilowatt  
1200 to 1500 kilowatts 4.1c, 1500 to 2000 kilowatts 4c, 2000 and over kilowatts 3.5c to 1200 KWH & over 4.5c per KW  
Minimum Charges Increased  
For one motor installed from \$1.25 per H. P. per month to \$1.50.  
For 2 to 5 motors installed from \$1.00 per H. P. per month to \$1.25  
For 6 or more motors installed from .90 per H. P. per month to \$1.00

Why should you help build Bedford? The reason is that you want to give children your own and others—the best possible place in which to grow up, and a place that will hold them AFTER they grow up. Join the Bedford Chamber of Commerce.

STAR ATHLETES NOT  
ALWAYS STRONG MEN

What is it that makes a great athlete, a star, as distinguished from a mediocre performer? asks Charles W. Paddock, Olympic champion, 100 metres, in discussing what he calls the "Science of Athletics". The man with a naturally large muscle development has an advantage over one who has not, and if he spends an equal amount of time in training himself will become the super-athlete or the champion.

Yet some of the greatest performers are not powerfully built. Landon of Yale, Olympic champion in the high jump, has not the appearance of an athlete, yet by persistent rope skipping, jumping with heavy shoes and garments, he has so developed his jumping muscles that he has greater spring in his legs than any other jumper in the world.

And Jackson V. Sholtz of the University of Missouri, who was the fastest sprinter until he retired recently, developed himself by practicing alertness, and did it so well that his muscles seemed to react to the sound of the gun; thus he gained two yards at the very start on his competitors.

Mr. Paddock insists that the best way to keep in training for one's athletic specialty is not to stick exclusively to it, for all star performers need relaxation. He should rather keep himself physically fit at all times, and then when he is going to take part in a contest spend a week or two at it alone. He advises athletes to indulge in some other sport than their specialty, once they have attained great excellence in it.

Among his other words of advice are: "There is nothing which will develop a boy or young man so quickly or so well as swimming. Bicycle riding too is not engaged in too strenuously, is wonderful exercise, and walking, along with either of these, furnishes a combination of muscular development hard to surpass. But if swimming is the form of sport the neophyte desired to perfect himself in, then a great deal of running would prove profitable. In the first place it is the direct opposite of swimming and develops an entirely different set of muscles. So that when the runner becomes a swimmer he can tell the progress he is making by the degree of soreness which he experiences. This soreness, of course, indicates that other muscles are being developed, and unless you swim a great deal, which is not good at first then it will take you a much longer time to develop your muscles."

"Again, in swimming, it's your chest and shoulders and arm muscles which receive the most attention, and by running you have also developed leg muscles as well. When you become a champion, that extra development which the running gave you will give you an advantage over the great swimmer who never ran. And so the theory holds true in many kinds of competitive sport. Though you may specialize in only one, you may gain a great deal of assistance from the participation in other kinds of athletics."

PREHISTORIC CORN  
FOUND IN TENNESSEE

Corn that grew in Tennessee in prehistoric times was unearthed recently by W. E. Meyer of the Bureau of American Ethnology and sent to the United States Department of Agriculture for identification. During recent excavations in Davidson County, Tenn., Mr. Meyers came upon a number of stone slab graves containing mottled vessels. Some of these held specimens of charred maize in fairly good condition. From the size and shape of the grains it was possible to identify the variety as Many-Rowed Tropical Flint. A form about half-way between true flint and popcorn. The same type of Indian corn occurs in the West Indies and there appears to have been a very early communication between the West Indies and North America. Not only corn but beans, squashes, pumpkins and tobacco are of tropical and subtropical origin. These staples, now so important throughout both hemispheres, found their way into North America and were cultivated beyond the Great Lakes in Canada long before the discovery of America.

## Mrs. Sarah Sheirer.

Mrs. Sarah Sheirer died at her home in Hyndman on Saturday November 5, aged 53 years, 11 months and 5 days. Death was due to a complication of diseases. Mrs. Sheirer had been an invalid for years and had been in a critical condition for the past few weeks. She was born at Bard, a daughter of William and Anna Luman Lehman. Her early years were spent near Bard and at the age of eighteen she was united in marriage to William Sheirer, who with one daughter, Mrs. Bertha Hayman, survives her. She is also survived by three grandchildren and the following sisters and brothers: Mrs. George Leonard, Postoria, Ohio; Mrs. John F. Leonard, Bedford; Mrs. J. E. Scharf, Cumberland, Md.; Mrs. E. E. McVicker, Possibility; Mrs. Charles Miller, Mt. Savage, Md.; Mrs. Emma Bell, Virginia; Humphrey Lehman, of Garrett and John Lehman of Hyndman.

The funeral services were held on Tuesday afternoon at 2 o'clock at the home, the pastor of the Reformed church officiating. Interment was made in the Hyndman cemetery.

Mrs. Sheirer was a kind and loving wife and mother and will be greatly missed in her home.

## PIGEON BREAKS RECORD

A pigeon from the Government's loft at Beltsville, Md., delivered a message from Mayor Thompson of Chicago to President Harding in 17 minutes, 14 seconds, breaking all former records.

## POINT

November 1st being the 55th anniversary of the marriage of Mr. and Mrs. R. C. Smith, Mrs. Smith having been a member of the 55th Regt. Penna. Volunteers and having attended the 55th National Encampment of the G. A. R. at Indianapolis, Indiana, in September and Mrs. Smith having pieced a quilt for each of her nineteen grandchildren, they decided it was not un-American to invite their neighbors and friends and have a social gathering and quilting party. By 10 o'clock a. m. the needles were being applied by the good neighbors and mothers and daughters of the community. Those present were: Mrs. John B. Nunamaker and two grand daughters, Mr. and Mrs. Thomas B. Nunamaker, Mrs. N. H. Riesel and daughter, Mrs. George Griffith, Mrs. Bert Blattenberger, Mrs. Harry Horner and son, Mr. and Mrs. Harry Wonders and son, Mr. and Mrs. W. C. Wonders, Mrs. Henry Shaffer and son, Mrs. H. S. McCreary and son, Mr. and Mrs. Josiah Hissong, Mrs. Charles Pensyl, Mrs. John Pensyl, Mr. and Mrs. Floyd Earnest, daughter and son, Mrs. Sherman Smith, Mrs. Harry Hoover and son, Miss Lou Amick and Mr. Charles Miller of Fishertown, Mrs. G. C. Claycomb, of Cessna. Mrs. Smith having pieced nineteen quilts and quilted them thinks that she has filled her mission in the quilt line. Mr. and Mrs. Smith feels grateful to all the neighbors present and feel very sorry for those who were prevented from coming by sickness and bad weather.

Mrs. J. E. Fetter and two daughters, Vida and Elizabeth, of Osterburg, and Mr. Manford Beckley, of Pittsburgh, were welcome visitors at the Smith home during the week. All present wished the happy 55 years married couple many years of health and returns of Nov. 1st.

The following were Sunday visitors at the home of your correspondent: Mr. and Mrs. Elias Ball, Mr. and Mrs. S. S. Poorman, Mr. and Mrs. Luther Ball and son William, Mrs. Abram Nicodemus and son, Clifford, and Miss Florence Poorman of Schellburg.

POSTURE IN SLEEP  
MAY TWIST FACE

A young woman who has always bemoaned the fact that her eyes slant up and the corners of her mouth droop went to a beauty specialist to see if the fault could be remedied by massage.

"How do you sleep?" asked the specialist. "In what position?"

"Why," answered she in surprise, "on my side."

"With one hand under your cheek, added the beauty doctor. "Now I'll show you something."

She pulled a big couch in front of the pier glass and ordered:

"Lie down on your side, facing that mirror. Put your head on the pillow and your hand as you usually do. Now look in the glass."

The girl looked and was astonished to see her cheek flatten out, forcing the outer corner of the eye up and the corner of the mouth down.

"See," said the specialist. "You have been giving yourself the equivalent of six or seven hours a day massage in the wrong direction. Now put your hand a little further back, under your ear. See, the fault is corrected."

And as to wrinkles. The number of ways that the hand under the cheek can make wrinkles in perfectly appalling. If you don't believe it lie down in front of a mirror and see for yourself.

Other examples of deformities produced in sleep are the very stooped individuals who invariably sleep like a letter C, and the little woman who always holds her head a little to one side and sleeps on her side with a huge pillow. A certain man who always lies upon his right side has a nose that slopes ever so little to the left, though it is quite certain that he has never seen the connection between his nose and that bed.

However, Dr. Otto R. Eichel of the Department of Health says that from the standpoint of hygienics the man is correct in sleeping always on his right side. When we sleep upon our left side we contract the space in which our heart can beat; if upon our back, the heart rests upon the aorta, which is bad for the circulation; the tongue falls back in the mouth, interferes with proper breathing and results in snoring. Sleeping upon the stomach also interferes, he says, with the heart action.

The best position is obtained by lying upon the right side, with the limbs comparatively straight and the head upon a low pillow.

As for himself, the doctor confessed to a superstitious fondness for always sleeping with his head to the north in line with the compass.

BLEEDING INHERITED  
THROUGH MOTHERS

Bleeders as those persons who tend to excessive bleeding are called, have a hereditary that is quite strange. Their disease is known as hemophilia. It is transmitted by the mother who herself does not have it. It goes from father to son or from grandfather to grandson, through a perfectly healthy mother.

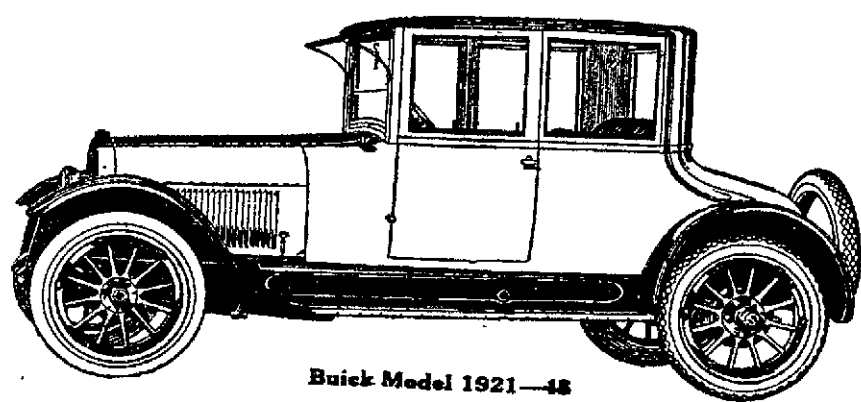

Thus, as Dr. C. W. Saleeby, the famous English physician, said in an address at the Infant Welfare Congress in London, these healthy mothers "defy the blessed principle of natural selection by declining to die of the disease in infancy and by living to transmit it to their own sons."

## RHEUMATISM ON WANE

There has been a marked decline in the mortality from acute rheumatism in the last ten years, and this is believed to be the consequence of the increased practice of removing diseased or infected tonsils.

# BUICK

Buick Model 1921-48

## CONFIDENCE

It is one thing to gain confidence---Another to hold it. The "BUICK" holds the confidence of its user thru-out its life through its consistent performance and dependability.

## ECONOMY OF OPERATION

is another thing which appeals to the Buick owner and is one of the things that is uppermost in the minds of "car buyers" and operators alike.

"The Buick Friends are Many"

## BEDFORD GARAGE
